Abstract of JP2000077864

PROBLEM TO BE SOLVED: To provide a computer desk unit capable of simplifying construction for wiring network cables and wiring work and easily expanding and changing a layout. **SOLUTION:** A computer desk unit comprises a desk top plate 2 on which a computer 5 is put, a cable storage box 4, and a plurality of legs 3. The cable storage box 4 comprising a U-shaped section cable storage member 4a and an upper cover 14 with its length equaled to the width of the desk top plate 2 to be installed, and the upper cover 14 is installed to the back of the desk top plate 2, so that upper face is on the same level as the upper face of the desk top plate 2. The inside of the cable storage box 4 is divided into two spaces, the first cable storage space 7 and the second cable storage space 9, by a Z-shaped partitioning member, a power cable 6 is set in the first cable storage space 7, and a network cable 8 is stored in the second cable storage space 9.
